Tabliss for Firefox comes in different languages and brings image edit features, such as the blur and darken options. The add-on looks neat, and it runs smoothly, without making the browser lag. The extension comes with some cool features. The app is totally free to use, but the devs of the New Tab page personalizer accept donations from people who appreciate their effort. But, you'll not get any limitations if you use Tabliss without paying for it. The add-on takes images from Unsplash and GIF files from GIPHY. You can easily set how frequent the pics and GIFs change with new ones, and you can also use your own photos or GIFs. In addition, you can simply search images on the Internet within the extension, by using tags, and the app will only show you those pics related to your search queries. The extension also permits you to make your own collection of images and GIFs from photos from the Internet or your personal pics. The ups and downs of Tabliss The application has a series of exciting features, but it also has one downside. Even though the devs are not guilty of this one, the app doesn't work with Dribbler anymore, although the option remains available in the Settings section of Tabliss. The developers said that they asked Dribble to support the extension on its new API, but we don't know if and when would that happen. Despite this small downside for Dribbler's fans out there, Tabliss for Firefox is indeed a reliable extension for the popular browser, helping users customize the New Tab page with colorful images and GIFs. The interface is easy to use, and you can easily enhance the way you look with some basic tools and countless effects. Beauty Effects is a great app to customize your apps and web pages. There are some presets such as Themed, Chrome, Fanta, and a bunch of others. You can also upload a picture to use as your theme, or you can even upload a picture and use the existing ones. The last available effect is the Chromatic Effect which takes your face and combines it with a background image. The app offers four themes to choose from and a myriad of effects to play around with. You can even upload an image as a background if you like, but if you opt for the Chromatic Effect, you'll need to decide what color to use, and that's where the fun comes in. The add-on is ad-supported, but it doesn't really bother you, as you can easily disable the ads if you want. This extension comes in handy because it offers a fully-featured photo editor for beginners, and it even includes a "magic wand" tool to apply the effects without undoing each one.
