Client SSL Certificate authentication in  
EJB+Glassfish I've created a webapp that connects  
to an EJB (which is currently running in glassfish  
server). I also have a client SSL certificate for the  
webapp, and I'm trying to figure out how to include  
authentication in the connection using it. I know that  
the connection to glassfish is over HTTPS (since the  
authentication is over SSL), and I know that you can  
put an SSL certificate on glassfish to use with the  
server. I don't see a way to put the client certificate  
on glassfish, though, and I'm not sure how it would  
help in this situation. Any ideas? A: You put the  
client cert on the server and pass it to the  
ClientAuthenticationHandler. E.g., in the server's  
main() method ClientAuthenticationHandler handler  
= new  
ClientAuthenticationHandler("client.truststore");  
handler.setPreemptiveAuthentication(true);  
handler.setAutoClientDetails(false);

---

```
handler.setAuthorizedClientHostnameVerifier(new
NullAuthorizedClientHostnameVerifier()); Context
    context = new InitialContext();
context.setInitParameter(Context.PROVIDER_URL,
    ""); context.setInitParameter(Context.SECURITY_PRINCIPAL,
    "cert1.pem"); context.setInitParameter(Context.SECURITY_CREDENTIALS,
    "cert1_pass.pem");
```

You must set the security principal using the setSecurityPrincipal method. If the client certificate is not at the server and is at the client, you can send the client cert to the server and hand off to the

```
ClientAuthHandler public class
GlassfishCertsAuthHandler extends
    ClientAuthHandler { public
GlassfishCertsAuthHandler(String truststoreFile)
    d0c515b9f4
```

I knew Chandra devi coming to my place. She's one of the most popular goddess in India. She blesses with wealth, love and prosperity. I was filled with joy hearing the word of her. Every night I asked for blessings from her. At that time my family was financially homeless and I begged her to bless my family. The goddess promised to bless us. Slowly her blessings started to show in our life. Now we're filled with wealth, love and joy. I continued the worship of the goddess and asked her to bless my family with many beautiful qualities and qualities of

---

a rich husband. My husband was just wishing for a luxurious home, but he didn't have a financial source to fulfill that. He also had a many children and little income to finance their education. After hearing my plea, the goddess assured me that my husband would get a millionaire next year and we will buy a new house. I was really surprised and blessed by the goddess. I was so excited to live in a millionaire house. After a few months, my husband became so wealthy that I was overwhelmed to accept what I got. In the same time, I wanted to help my poor children in the best way I can. I pleaded again to the goddess, asking her to bless my children with great qualities. The goddess assured me that my children will be well-educated and well-behaved. I was filled with joy and proud of the goddess for her great power. My husband didn't agree to what I had said from my first request. He didn't go to the temple for a year. My husband thinks that the goddess might disappoint us. I think that if he went to the temple, he will be blessed with the same qualities he wants. I prayed to the goddess to please keep me happy. A few months later, he came to the temple and asked the goddess for blessings. He was very thankful to the goddess. He got what he desired and now has money to fulfill my wish. After that, I asked the goddess to help me with my dying mother. The goddess gave me special
